

Mezo Legacy

BITCOIN LAYER 2 · DEFI PLATFORM

SUPERNORMAL DAPPS · MUSD TRACK · CHAIN 31611

Borrow MUSD. Keep your Bitcoin.

Self-service Bitcoin banking on Mezo Network — deposit BTC, mint **MUSD at 1% fixed APR**, deploy for yield, keep full custody. No intermediaries.

₿ MUSD Integration

✓ 4 Contracts Live

⚡ 37 / 37 Tests Pass

THE PROBLEM

Bitcoin sits idle. It deserves better.

Dead Capital

Over \$600B in BTC earns zero yield. Holders must choose between security and productivity.

Fragmented L2s

Existing Bitcoin L2s lack EVM compatibility, making them hard to build on and difficult to use.

No Native DeFi

Wrapped BTC on Ethereum introduces custodial risk. There's no native BTC DeFi layer.

THE SOLUTION

Bitcoin-Backed MUSD + Self-Service Banking

MezoBorrow — MUSD at 1%

Deposit BTC collateral → mint MUSD stablecoin at 1% fixed APR. No lock-up. Close any time. Full self-custody.

MezoVault — BTC Savings

Deposit native BTC into an auditable on-chain vault. Live TVL read every 12 seconds.

MezoStaking — 4.8% APY

Stake BTC, earn yield. No lock-up. Deploy MUSD elsewhere for even higher returns.

ARCHITECTURE

Monorepo & Full-Stack Design

KEY FEATURES

Everything a Bitcoin DeFi User Needs

Borrow MUSD — 1% APR

Deposit BTC collateral → mint MUSD stablecoin · live CR health bar · repay any time

Dashboard

Portfolio overview · live BTC price chart · MUSD balance · carry-trade metrics

Vault Page

Deposit & withdraw BTC via MezoVault · live on-chain TVL read

Staking Page

Stake & unstake via MezoStaking · 4.8% APY · rewards history chart

Transaction History

Full activity log · Borrow / Repay types · links to Mezo explorer

Live Chain Data · PWA

Block · gas · BTC/USD — auto-refresh every 12 s · installable as PWA

How We Score Across All Criteria

₿ Mezo Integration & MUSD Usage

30%

MezoBorrow contract · MezoMUSD ERC-20 · 1% APR · 150% min CR · full borrow/repay/close UI

📈 Business Viability & Market Fit

30%

Borrow at 1% → deploy MUSD for 4–8% yield → +3–7% net carry trade · no lock-up · self-custody BTC

🔧 Technical Implementation

20%

37 / 37 Hardhat tests · CEI + reentrancy guards · TypeScript strict · 4 contracts live · Turborepo monorepo

🌟 UX & Design

10%

PWA installable · live data · CR health bar · dark UI · mobile responsive

ROADMAP

What's Next for Mezo Legacy

PHASE 1 — COMPLETE ✓

MezoMUSD + MezoBorrow + Vault + Staking deployed · BorrowPage live · 37 tests · PWA · Vercel

PHASE 2 — IN PROGRESS

Contract verification on Mezo Explorer · MUSD yield integrations · liquidation engine · price oracle

PHASE 3 — PLANNED

Multi-asset vault support · Governance token · DAO voting module · Cross-chain bridge

PHASE 4 — FUTURE

Mainnet launch · Institutional vault tiers · BTC yield aggregator · SDK for developers
